

Chicago Crime Analytics — Insights

This document uses the validated Stage 9 analysis outputs for the supplied 2,000-record dataset. Findings are descriptive and do not establish causality.

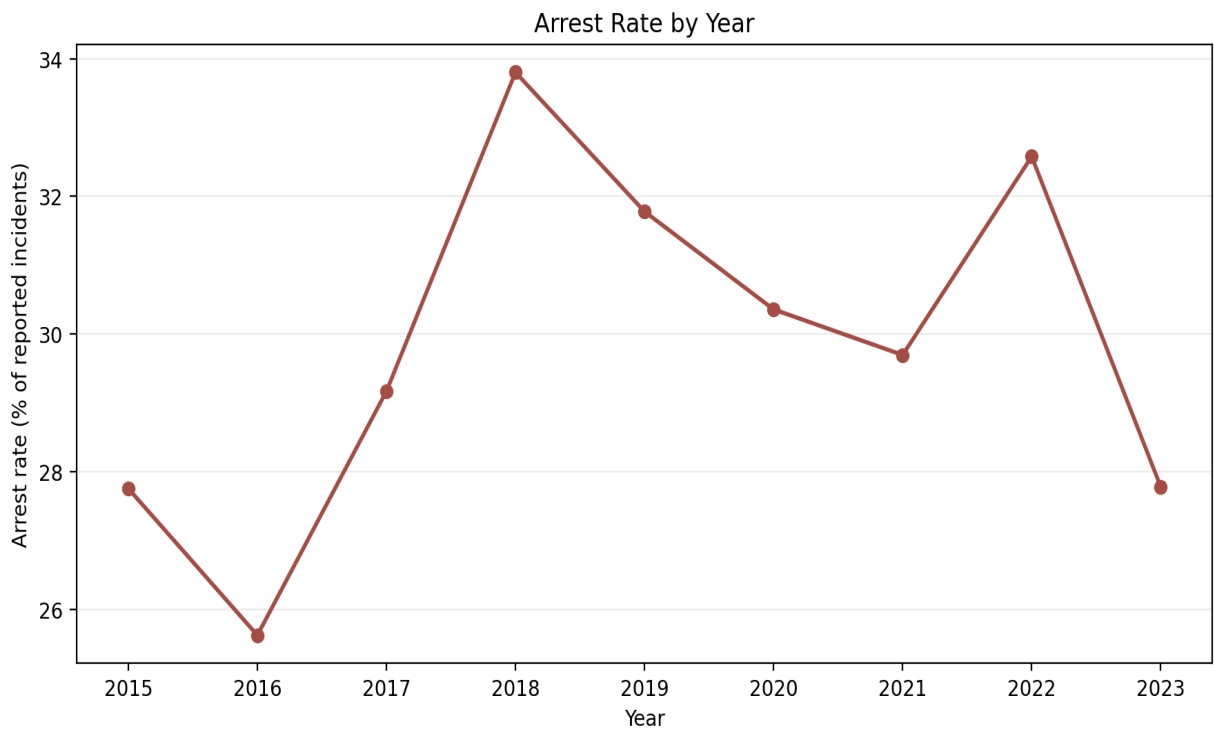

Crime trend by year

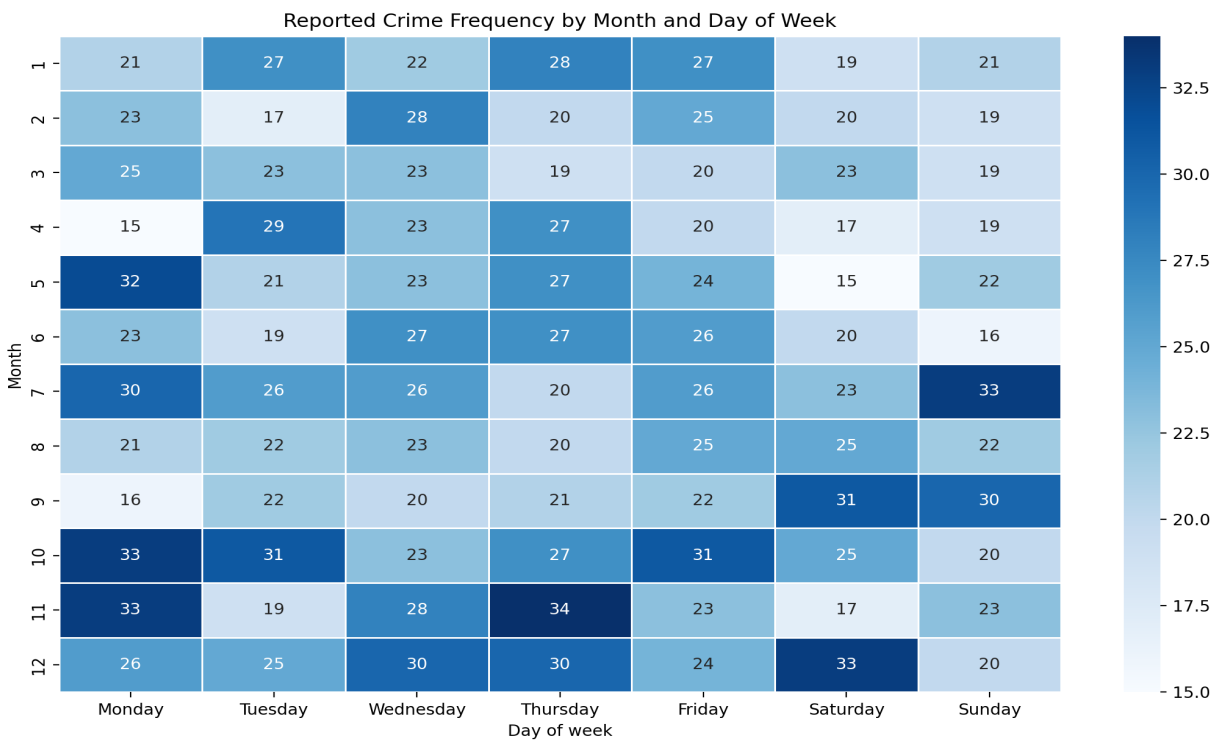

Top crime categories

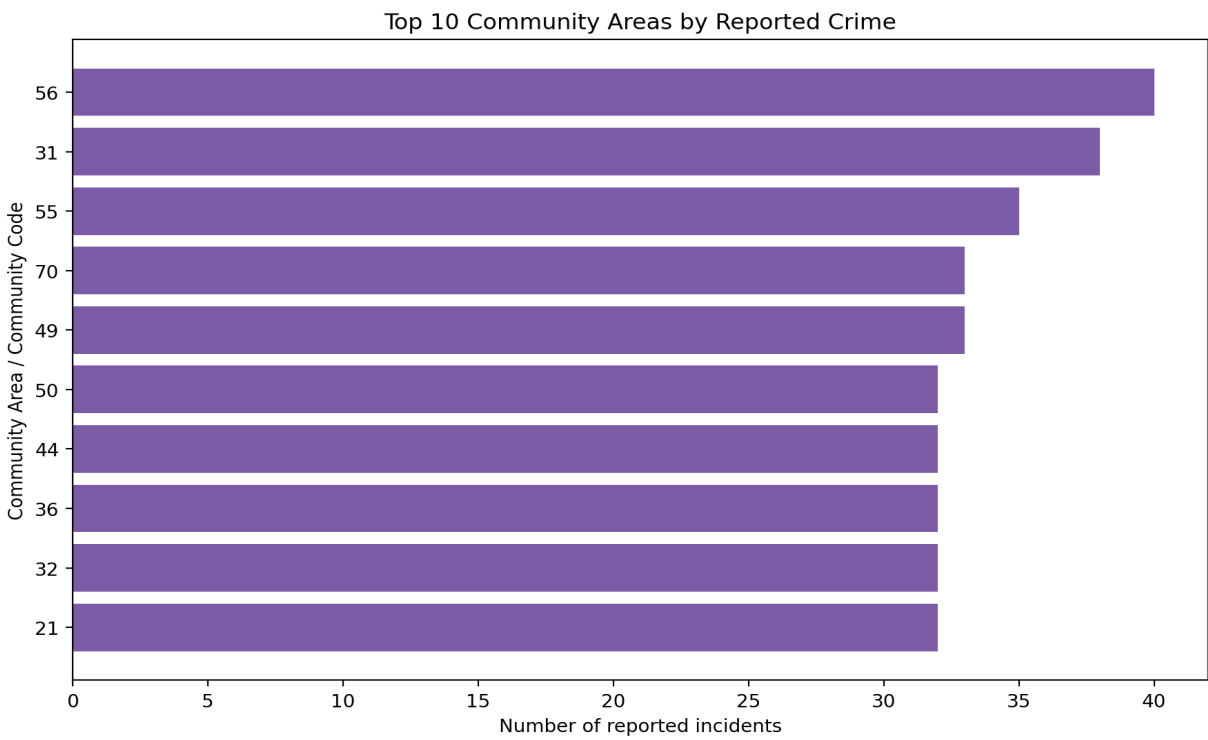

Arrest rate by year

Month × DayOfWeek heatmap

Top community areas

Analytical notes

The charts identify variation across years, concentrated crime categories and community areas, changing arrest rates, and month/day frequency patterns. These results can guide further investigation and resource-planning questions when combined with context beyond this extract.
